

Our Tradition

Since 1982 Bradford Products has been the premier manufacturer of stainless steel products. We specialize in design and fabrication of pools and spas, day spa thermal rooms, water features, therapy pools, SwimSpas®, and other custom specialty features. You'll find our products in facilities and homes across the United States and around the world. We are the trusted experts in custom stainless steel fabrication.

Yacht Spas

Bradford Products, the leader in design, engineering, and fabrication of quality stainless steel pools, spas, and SpaExperience® relaxation rooms, now provides luxury resort standards for your yacht. The durability and longevity of 316L stainless steel ensures that you will be able to enjoy the on-board SpaExperience® for many years, confident in the construction and performance in the harsh ocean going and salt environments. In these terms, no construction material is a better choice than stainless steel. Properly maintained, a stainless steel spa will not crack, delaminate, discolor, leak, or require renewing finishes over the lifespan of the vessel.

Clad in luxurious tile of *your* choice, you're no longer limited to the finish or color of an acrylic pool or spa. Our creative hydrotherapy products capture the essence of what you desire in the ultimate relaxation experience: the well-being, of mind, body, and spirit.

Custom Solutions

Bradford works closely with designers, naval architects, and builders to create solutions that precisely integrate with the operating systems and aesthetics of the vessel. Components like perimeter gutters, surge tanks, custom filtration, rapid heating, and quick-fill and drain technology, make these true yacht spas.

Our Warranty

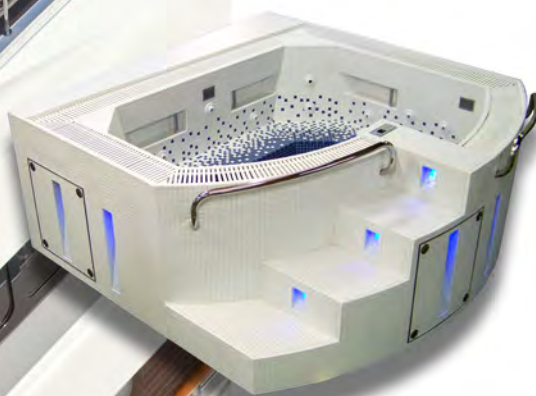

Built for strength, stainless steel spas deliver the quality and durability your yacht deserves. Backed by the Bradford 25-year warranty, your spa will last a lifetime.

Our Work

Bradford signature yacht spas are ideal for new builds or retrofitted vessels, a selection of which can be found on:

*Carpe Diem, 58m • Unbridled, 58m • Mia Elise, 50m
Hemisphere, 44m • SeaQuell, 33m*

Commercial Vessels:
The World Ship
Crystal Cruises
Holland America Line
Carnival Cruise Line

The Private Heaven

Bradford's Private Heaven combines all the features of our SteamRoom® and signature Experience Shower along with a heated bench to provide the ultimate on-board spa relaxation amenity. The integration of traditional day spa therapies with innovative technology creates a single unique space in lieu of multiple treatment rooms. The design of The Private Heaven can evolve from your own imagination and desires, tailored to your personal needs. Bradford's talented team will collaborate with your designer and builder to ensure your vision is realized.

A touchscreen panel provides a menu of options that bathers can choose from. Fusing custom sequences of chroma, aroma, and audio therapy, couples or single users can create their own personal experience or select from pre-programmed options such as Arctic Blast, Island Storm, Tropical Rain, and Aqua massage. After spending time in this sensual atmosphere of experiences, you will truly understand Bradford's concept of Private Heaven.

Thermal Rooms

Bradford has enhanced the ancient Roman bathhouse tradition with state-of-the-art thermal rooms, synchronizing custom lighting, sound, aromatherapy, and water features. We have developed exciting new variations on typical thermal rooms such as Laconiums, Hammams, and Tepidariums that are ideally suited to larger spaces, while still delivering a personal and intimate day spa experience.

Heated Loungers

Enjoy your sunsets and stargazing from a whole new level, comfortably seated topside on a heated lounge. Gentle warmth radiates through the luxuriously tiled surface and into your body, providing a serene lounging experience. Popularized by the cruise ship industry, the heated lounge lets you enjoy the evenings longer as the cooler weather approaches and are equally suited for indoor or outdoor use.
