Bradford's Ice Fountains serve as the centerpiece of an imaginative and culturally influenced thermal spa experience. Each fountain is uniquely designed to match and enhance the aesthetics of the spa facility. Bradford Ice Fountains optimize the benefits of cold spa environments that can be accompanied with Arctic Rooms that incorporate artificial snow and chilling mist. Ice Fountains and their pedestals are customized to complement your project's design intent. Our team will custom design a feature for your facility that is truly extraordinary. The rapid cool down delivered by Bradford Ice Fountains naturally enhances wellness of the skin, tissue, and muscle. Using the Ice Fountain after a Bradford Experience Shower, hot tub, or SteamRoom® adds further benefit as ice from the basin stimulates blood circulation and strengthens the immune system.
