■ Bradford's Ice Fountain gives you an invigorating experience as the rapid cooldown naturally attributes to the wellness of skin, tissue, and muscle. Traditionally, Scandinavians used accessible snow to reduce body temperature immediately after a dry sauna or steam room treatment. Resorts can now simulate this experience with Bradford's Ice Fountain as part of an imaginative and culturally influenced spa environment. We have designed artificial snow, low-lying fog, and chilling Arctic Rooms for cold environments. Used after an Experience Shower, hot tub, or SteamRoom®, ice from the basin is applied directly to the body, stimulating blood circulation and strengthening the immune system. Ice Fountains and their pedestals can be as ornate or conventional as your project requires. Our team will custom design a feature for your facility that is truly extraordinary.
