RIVERRIDE®

WORLD-CLASS LUXURY
RESORT AMENITY

RiverRide®

FEATURES

Customized design

Stainless steel shell and bracing to allow for expansion and building movement without pool cracks and leaks

Suited for rooftop and elevated application

CAD designed and engineered

Choice of tile, tile trim or stainless steel finish

High-quality commercial tile to meet codes and requirements

Handicap lifts, ramps and access areas are available to meet ADA requirements

Long lasting and low maintenance

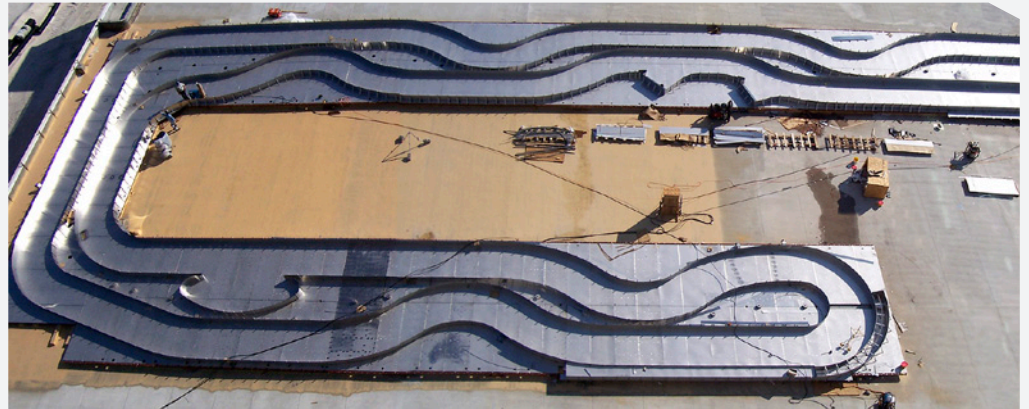

Watertight welded construction

BradPack™ equipment provided for commercial application

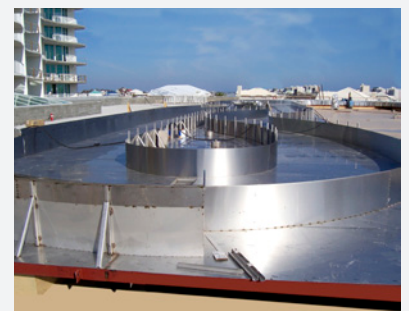

Warranty: 25 yr. structural stainless steel shell; 1 yr. approved tile adhesion; 1 yr. plumbing; 1 yr. electrical components

ASK US ABOUT OUR:

Hot Tubs	Thermal Rooms
SwimSpas®	VitalityTubs
Yacht Spas	Experience Showers
Water Features	Ice Fountains
Heated Loungers	Therapy Pools

Bradford has designed and engineered the most reliable rooftop lazy river pool system available to hotels and resorts. With watertight welded fabrication, lightweight structural material, and decreased installation costs, Bradford's RiverRide® solves the problems a rooftop and elevated application often faces. Stainless steel offers an advantage over other typical aquatic construction in an elevated environment because it withstands the natural movement of buildings better than rigid concrete. Concrete often incurs more on-going maintenance and repairs for leakage. Stainless steel also makes the RiverRide® a lightweight construction advantage with respect to structural cost for the hotel or resort. Bradford's team installs the prefabricated sections on-site, further reducing construction and installation time.
